

Author's Instructions for the *Journal of Oral Health & Oral Epidemiology*

Journal of Oral Health & Oral Epidemiology is the official journal of the Oral and Dental Diseases Research Center of Kerman University of Medical Sciences. The journal publishes original research articles, review articles, and case reports dealing with oral health and epidemiology. Papers in any of the following fields will be considered for publication: oral health, oral and dental treatment research, oral and dental epidemiology, as well as any issues regarding improvement of oral and dental treatment.

EDITORIAL REVIEW AND ACCEPTANCE

The editorial board considers all medical research studies based on ICMJE recommendations about the conduction, reporting, and editing of these investigations. The acceptance criteria for all papers are the quality and originality of the research, and its significance to our readership. Except for invited papers, submitted manuscripts are peer reviewed via a double-blinded process by three anonymous reviewers, and the journal's editorial board. Final acceptance or rejection is depending on the editorial board decision on peer reviewed papers. Manuscripts should be written in a clear, concise and direct style. The Editorial board reserves the right to edit accepted papers to be more concise and free of grammatical typos and errors. Following acceptance an edited form of the paper will be sent to the authors' correspondence for final review and approval. If extensive alterations are required, the manuscript will be returned to the author for major revision.

PUBLICATION FEE

Publishing articles in *Journal of Oral Health & Oral Epidemiology* is free of charge.

SUBMISSION OF MANUSCRIPTS

The *Journal of Oral Health & Oral Epidemiology* is using an online submission and peer review.

To submit a manuscript, please open journals website at: <http://johoe.kmu.ac.ir>

Getting Help with Your Submission

Any enquiries should be sent to:

Mrs. Pouradeli

Editorial Assistant, *Journal of Oral Health & Oral Epidemiology*

Oral and Dental Diseases Research Center, Qusar Boulevard, Kerman, Iran.

Email: johkmu@yahoo.com; johkmu@kmu.ac.ir

Tel: +98 34 32133440

Cover Letter

Papers should be submitted considering the fact that it's content has not been published or submitted for publication elsewhere except as an abstract in a scientific meeting or congress. This must be stated in the covering letter.

The covering letter must also contain an acknowledgement that all authors have contributed significantly, and that all authors are in agreement with the content of the manuscript.

Authors must declare any financial support or relationships with companies and should disclose any conflict of interest at the time of submission. Such information will be held in confidence while the paper is under review and will not affect decision about acceptance or rejection of the paper.

If tables or figures from previously published articles have been used in a submit paper a letter from the copyright holder (the Publisher), permitting to reproduce the material, must be attached to the covering letter.

PARTS OF THE MANUSCRIPT

Manuscripts should be presented as following orders: a) title page, b) structural abstract and keywords, c) introduction, d) method and materials, e) results, f) discussion, g) conclusion, h) acknowledgements, i) references, j) figures, k) tables (each table complete with title and footnotes).

Title Page

The title page should contain a) the title of the paper, b) the full names of the authors, c) the running title, d) the authors' affiliation and d) the full postal and email address of authors.

The running title should be a brief version of the title of the paper, no more than 50 characters long including spaces (5-6 words). The running title needs to both make sense as a phrase and give some idea of what the paper is about.

Abstract and Keywords

All articles must have a structural abstract contains a) background and aim, b) methods, c) results, d) conclusion in 300 words or fewer.

At least three keywords should be supplied at the end of abstract. MeSH can be used for choosing right keywords.

Main Document

The main document of the manuscript should not exceed than 2000 words except for review and invited articles. The main document should contain: a) introduction, b) method, c) results, d) discussion, and e) conclusion.

Case report should contain abstract, introduction, case report, and discussion. Case report should not exceed than 1500 words.

All submitted manuscript should be compatible with word 2007 with font size 12 Book Antiqua and single space between main documents lines.

Acknowledgements

The source of financial support and funding must be acknowledged.

References

Journal of Oral Health & Oral Epidemiology has instructed authors to use the Vancouver system of referencing. In the main document, references should be cited with parentheses and in order of their appearance in the text.

The maximum number of references for scientific articles, case reports and clinical updates are 35, 25, and 20, respectively. Review literatures and invited articles have no limit on the number of references.

In the reference list, cite the names of all authors when there are six or fewer; when seven or more, list the first six followed by et al. Reference list should contain all references that have been addressed in any part of the manuscript.

Names of journals should be abbreviated in the style used in Index Medicus.

Authors are responsible for the accuracy of the references.

References should be listed in the following form

Journal Article

1. Hori A, Poureslami HR, Parirokh M, Mirzazadeh A, Abbott PV. The ability of diagnostic sensibility tests to evaluate pulp vitality in primary teeth. *Inter J Paedia Dent* 2011; 21(6):441-5.

Chapter in a Book

Haapasalo M, Qian W: Irrigants and Intracanal Medicaments. In: Ingle JI, Bakland LK: *Endodontics* 6. 6th ed. BC Decker Inc, Hamilton; Ontario, Canada. 2008; Chapter 28: 997-9.

Book

Neville BW, Damm DD, Allen CM, Bouquot JE. Oral and maxillofacial pathology. 2nd ed. Philadelphia: W.B Saunders Co.; 2002. pp. 533–87.

Web Pages

ProRootMTA safety data sheet. Available at: http://store.maillefer.com/lit2/pdfs/MTA-MSDS-W_01-02C.pdf. Accessed November 27, 2009.

Tables

Tables should not duplicate information that have been described in the text. Table legend should be written above it and all tables should be print in separate pages. At the end of manuscript Table legend should be comprehensive and footnotes must be described for each table separately. All abbreviations must be defined in footnotes.

Figures

Illustrations (diagrams and photographs) are classified as figures.

The figures should be provided electronically with high resolution (at least 600 d.p.i.) files should be saved as .JEPG or .Tif format. The figures must not be embedded in the word document - they must be uploaded in the separate files.

Magnifications of microscopic images should be indicated using a scale bar on the illustration or in the figure legend.

Figure legends should be written on separate pages at the end of the manuscript. Legends should be brief but comprehensive. Explain all abbreviations and the unit of measurements in the figure legend. If table(s) or figure(s) used from previously published documents, authors should send a permission letter from the copyright holder to the editorial office of the JOHOE.

Abbreviations, Drug Names, Digits

Use standard abbreviations in the Oral Health and Oral Epidemiology Journal papers without definition in the text. Standard abbreviations, however, should be defined at first mention in the abstract. Each nonstandard (author-defined) abbreviation should be defined in the abstract and text at first mention. If three or more nonstandard abbreviations are used in the text, prepare an abbreviation footnote. The footnote should be associated with the first abbreviated term in the text and should be an alphabetized listing of all author-defined abbreviations and their definitions. Group designations should be defined parenthetically at first mention [for example, "control (CON) and high-fat (HF) groups"] and included in the abbreviation footnote. Abbreviations (other than units such as min, h, m, kg) should be pluralized where appropriate (e.g., The n–3 PUFAs are...) but should not be followed by a period.

All nonstandard abbreviations, including group or treatment designations, used in a table or table title, must be defined alphabetically in a footnote to the table title. If the footnote to the table title contains multiple items, the definitions of the abbreviations should be the last item. If a table contains only one abbreviated term in the body of the table, then a separate footnote placed after that abbreviation should be used to define that term. Similarly, all nonstandard abbreviations, including group or treatment designations, used in a figure or figure legend must be defined alphabetically at the end of the figure legend.

All drugs' name (both commercial and generic names); the manufacture, the city, and the country it's made by should be declared.

PLAGIARISM

Submitted papers will be examined for the evidence of plagiarism using [PlagScan](#) automated plagiarism detection service. Authors are responsible for plagiarism check. It is very important for the editorial board of the Journal of Oral Health & Oral Epidemiology and the manuscript may be rejected, even if it has been accepted by reviewers.

CONFLICTS OF INTEREST

Conflicts of interest include facts known to a participant in the publication process that if revealed later, would make a reasonable reader feel misled or deceived (or an author, reviewer, or editor feel defensive). Conflicts of interest may influence the judgment of authors, reviewers, and editors; these conflicts often are not immediately apparent to others or to the reviewer. They may be personal, commercial, political, academic, or financial. Financial interests may include employment, research funding (received or pending), stock or share ownership, patents, payment for lectures or travel, consultancies, nonfinancial support, or any fiduciary interest in the company.

The perception or appearance of a conflict of interest, without regard to substance, alone creates conflict, because trust is eroded among all participants. All such interests (or their absence) must be declared in writing by authors upon submission of the manuscript. If any are declared, they should be published with the article. If there is doubt about whether a circumstance represents a conflict, it should be disclosed. Sources of full or partial funding or other support for the research must be declared and should be described in an acknowledgement if the manuscript is published; if anyone besides the authors is involved in analysis, interpretation, or control of the data, this must also be declared. The funding organization's or sponsor's role in the design and conduct of the study; in the collection, analysis, and interpretation of the data; and in the preparation, review, or approval of the manuscript should be specified.

Each author should provide a summary conflict of interest statement to be included on the title page of the manuscript. If no author has a conflict of interest, include the following: "the authors have declared that no conflict of interest exists."

PUBLICATION ETHICS AND MALPRACTICE STATEMENT

Section A: Publication and Authorship

1. All submitted papers are subject to strict peer-review process by at least two international reviewers that are experts in the area of the particular paper. Reviewers are being selected by Associate Editors and Editor in Chief. Author also can propose reviewers for some journals and article types.
2. The factors that are taken into account in review are relevance, originality, readability, statistical validity and language.
3. The possible decisions include acceptance, minor revisions, major revision or rejection.
4. If authors are encouraged to revise and resubmit a submission, there is no guarantee that the revised submission will be accepted.
5. Rejected articles will not be re-reviewed.
6. The paper acceptance is constrained by such legal requirements as shall then be in force regarding libel, copyright infringement and plagiarism.
7. No research can be included in more than one publication, whether within the same journal or in another journal.

Section B: Authors' Responsibilities

1. Authors must certify that their manuscript is their original work.
2. Authors must certify that the manuscript has not previously been published elsewhere, or even submitted and been in reviewed in another journal.
3. Authors must participate in the peer review process and follow the comments.
4. Authors are obliged to provide retractions or corrections of mistakes.

5. All Authors mentioned in the paper must have significantly contributed to the research. Level of their contribution also must be defined in the “Authors’ Contributions” section of the article.
6. Authors must state that all data in the paper are real and authentic.
7. Authors must notify the Editors of any conflicts of interest.
8. Authors must identify all sources used in the creation of their manuscript.
9. Authors must report any errors they discover in their published paper to the Editors.
10. Authors must not use irrelevant sources that may help other researches/journals.
11. Authors cannot withdraw their articles within the review process or after submission, or they must pay the penalty defined by the publisher.

Section C: Peer Review/Responsibility for the Reviewers

1. Reviewers should keep all information regarding papers confidential and treat them as privileged information.
2. Reviews should be conducted objectively, with no personal criticism of the author. No self-knowledge of the author(s) must affect their comments and decision.
3. Reviewers should express their views clearly with supporting arguments in 500 to 1000 words.
4. Reviewers may identify relevant published work that has not been cited by the authors.
5. Reviewers should also call to the Editor in Chief's attention any substantial similarity or overlap between the manuscript under consideration and any other published paper of which they have personal knowledge.
6. Reviewers should not review manuscripts in which they have conflicts of interest resulting from competitive, collaborative, or other relationships or connections with any of the authors, companies, or institutions connected to the papers.

Section D: Editorial Responsibilities

1. Editors (Associate Editors or Editor in Chief) have complete responsibility and authority to reject/accept an article.
2. Editors are responsible for the contents and overall quality of the publication.
3. Editors should always consider the needs of the authors and the readers when attempting to improve the publication.
4. Editors should guarantee the quality of the papers and the integrity of the academic record.
5. Editors should publish errata pages or make corrections when needed.
6. Editors should have a clear picture of a research's funding sources.
7. Editors should base their decisions solely on the papers' importance, originality, clarity and relevance to publication's scope.
8. Editors should not reverse their decisions nor overturn the ones of previous editors without serious reason.
9. Editors should preserve the anonymity of reviewers (in half blind peer review journals).
10. Editors should ensure that all research material they publish conforms to international accepted ethical guidelines.
11. Editors should only accept a paper when reasonably certain.
12. Editors should act if they suspect misconduct, whether a paper is published or unpublished, and make all reasonable attempts to persist in obtaining a resolution to the problem.

13. Editors should not reject papers based on suspicions; they should have proof of misconduct.
14. Editors should not allow any conflicts of interest between staff, authors, reviewers and board members.
15. Editors must not change their decision after submitting a decision (especially after reject or accept) unless they have a serious reason.

Section E: Publishing Ethics Issues

1. All editorial members, reviewers and authors must confirm and obey rules defined by COPE.
2. Corresponding author is the main owner of the article so she/he can withdraw the article when it is incomplete (before entering the review process or when a revision is asked for).
3. Authors cannot make major changes in the article after acceptance without a serious reason.
4. All editorial members and authors must will to publish any kind of corrections honestly and completely.
5. Any notes of plagiarism, fraudulent data or any other kinds of fraud must be reported completely to COPE.

AUTHORSHIP

As stated in the Uniform Requirements for Manuscripts Submitted to Biomedical Journals, credit for authorship requires substantial contributions to: 1. Substantial contributions to the conception or design of the work; or the acquisition, analysis, or interpretation of data for the work; AND 2. Drafting the work or revising it critically for important intellectual content; AND 3. Final approval of the version to be published; AND 4. Agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

All authors must sign authorship form attesting that they fulfill the authorship criteria. Your submitted manuscript will not be processed unless this form is sent. There should be a statement in manuscript explaining contribution of each author to the work. Those contributors who did not fulfill authorship criteria should be listed in acknowledgments.

Any change in authorship after submission must be approved in writing by all authors. All persons designated as authors should qualify for authorship. The order of authorship should be a joint decision of the co-authors. Assurance that all authors of the paper have fulfilled these criteria for authorship should be given in the covering letter.

Changes to Authorship

Before the accepted manuscript is published in an online issue: Requests to add or remove an author, or to rearrange the author names, must be sent to the Journal Manager from the corresponding author of the accepted manuscript and must include: (a) the reason the name should be added or removed, (b) written confirmation (E-mail or letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Requests that are not sent by the corresponding author will be forwarded by the Journal Manager to the corresponding author, who must follow the procedure as described above. Note that: (1) Journal Managers will inform the Journal Editors of any such requests and (2) publication of the accepted manuscript in an online issue is suspended until authorship has been agreed. After the accepted manuscript is published in an online issue any requests to add, delete, or rearrange author names in an article published in an online issue will follow the same policies as noted above and result in a corrigendum.

STATEMENT OF HUMAN AND ANIMAL RIGHTS

When reporting experiments on human subjects, authors should indicate whether the procedures followed were in accordance with the ethical standards of the responsible committee on human experimentation (institutional and national) and with the Helsinki Declaration of 1975, as revised in 2000.

If doubt exists whether the research was conducted in accordance with the ethical standards, the authors must explain the rationale for their approach, and demonstrate that the institutional review body explicitly approved the doubtful aspects of the study. When reporting experiments on animals, authors should be asked to indicate whether the institutional and national guide for the care and use of laboratory animals was followed.

STUDY DESIGN

Describe your selection of the observational or experimental participants (patients or laboratory animals, including controls) clearly, including eligibility and exclusion criteria and a description of the source population.

Technical information: Identify the methods, apparatus (give the manufacturer's name, the city, and the country its made by in parentheses), and procedures in sufficient detail to allow other workers to reproduce the results. Give references to established methods, including statistical methods (see below); provide references and brief descriptions for methods that have been published but are not well known; describe new or substantially modified methods, give reasons for using them, and evaluate their limitations. Identify precisely all drugs and chemicals used, including generic name(s), dose(s), and route(s) of administration.

Reports of randomized clinical trials should present information on all major study elements, including the protocol, assignment of interventions (methods of randomization, concealment of allocation to treatment groups), and the method of masking (blinding), based on the CONSORT Statement (<http://www.consort-statement.org>).

REVIEW AND ACTION PROCESS

A submitted manuscript is assigned to the Senior Editor of the appropriate subject section. The Senior Editor assigns it to an Associate Editor who manages and adjudicates its review. The Editors will return manuscripts that are judged to be outside the scope of the journal. Manuscripts can be returned without review for reasons that include:

- Grammar and style that is not of the quality expected in a published article;
- The topic or scope of the work is not within the scope of the journal;
- The presentation of the findings is not directed to the readership of the journal;
- The methods or approaches are judged to be flawed.

All editorial board members would receive the submitted manuscript and in a meeting would approve either sending manuscript to referees or rejecting it. Manuscripts sent for review are examined by three or more reviewers selected for their expertise in the subject matter of the article. Reviewers will remain anonymous (unless they choose to reveal themselves). The editorial board members make one of the following decisions on the manuscript:

- Accept
- Accept pending minor revision
- Reconsider upon revision
- Reject
- The average time from submission until decision is expected to be 45 days or less.

COPYRIGHT NOTICE

Authors who publish with this journal agree to the following terms:

a. Authors retain copyright and grant the journal right of first publication with the work simultaneously licensed under a Attribution-NonCommercial 4.0 International that allows

others to share the work with an acknowledgement of the work's authorship and initial publication in this journal.

b. Authors are able to enter into separate, additional contractual arrangements for the non-exclusive distribution of the journal's published version of the work (e.g., post it to an institutional repository or publish it in a book), with an acknowledgement of its initial publication in this journal.

c. Authors are permitted and encouraged to post their work online (e.g., in institutional repositories or on their website) prior to and during the submission process, as it can lead to productive exchanges, as well as earlier and greater citation of published work (See [The Effect of Open Access](#)).

PRIVACY STATEMENT

The names and email addresses entered in this journal site will be used exclusively for the stated purposes of this journal and will not be made available for any other purpose or to any other party.

PREPARATION CHECKLIST SUBMISSION

The research articles should follow the subsequent pattern,

1. Title Page
2. Abstract
3. Introduction
4. Methods and materials
5. Results
6. Discussion
7. Conclusions
8. Future Recommendations, if any
9. Acknowledgements, if any
10. References
